## RPC AND PET – THE CHOICES ARE CLEAR

There's no material quite like PET – its strength and versatility, crystal clarity and barrier properties make it ideal for a huge variety of products.

PET represents a wise packaging choice – so make sure you choose your packaging supplier with equal care.

RPC's reputation for PET excellence is well documented with a host of innovative designs for top brands.

Our extensive pre-form library means we can devise standard or custom packs to meet your specific product and marketing objectives.

State-of-the-art production machinery plus labelling and sleeving facilities enable us to offer a complete container and decoration service.

Our experience in wide mouth containers is unmatched – but with our own in-house design team and extensive knowledge of the capabilities of PET, we are ideally placed to develop packs for any type of product or application.

Tell us your specific requirements and we'll devise an appropriate solution.

RPC's expertise in PET reflects its position as Europe's leading manufacturer of rigid plastics packaging, with factories throughout the UK and mainland Europe supplying customers on a local or multinational basis.

With our wide range of manufacturing and finishing technologies, we deliver packaging solutions to industrial and consumer markets, including food and drink, catering, paint and DIY, pharmaceuticals, industrial, household chemicals, lubricating oils, personal care, and promotional packaging.

For PET packaging, there is no clearer choice.
